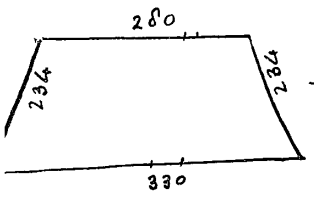
Report on the construction of the proposed temple at channa-rajpet Bangalore.

The work of constructing the temple was first given on contract to one Raju Moodr of Nsoor who after finishing the foundation and basement of the temple and in addition collecting 53 Stone beams, 10 dressed Stone pillars, 568 Sft. of Stone slabs, 5748 Cft. of rough Stones and a few small dressed slabs to be made use of in the construction of the temple left the work uncompleted, besides failing to render account for Rs 700. advanced to him.

Subsequently the construction of the compound wall was given to Subbamma who however has used all the rough stones collected by Raju Moodr in completing the

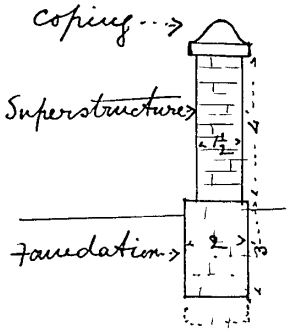
construction of the compound wall of the temple, over and above the materials supplied by himself. After deducting the cost of the old materials used by the latter contractor, the cost of constructing the compound wall amounts to Rs 1601–13–2, for which a sum of Rs 500–0–0 has been advanced to him, and so the balance of Rs 1101–13–2 is due to him as per measurement list accompanying. The measurements were taken for the first time by me and were checked a 2nd time by B Hanmiah and myself.

The compound walls form a trapezoid as shown in the margin and measure



330 ft. long on the North, 280 ft. on the South and 234 ft. each on the E & W. The foundation of stone in mud is sunk 2 ft. broad and in depth 3 ft. in the average.

The walls themselves are of burnt stone in mud, and chunam pointing. 4ft. high and ½ ft. thick, with pillars 20 ft. And on the top there is the coping of brick in mud with chunam plastering



The sketch on the margin shows the dimensions of the structure of the compou wall.

My dear Ti, 108

I received yesterday
registered by you, I
received here with two
letters & a rough
sketch of a "Gobarium"
(notharium torsale) for
building a "Gobarium" &
a "Mahadwarium" to
the new Buildings Siva

temple at ~~Mat~~ Chamundi prepared by Mudki Kanjimadabba, who built the temple.

The Government being a technical work, it should be thoroughly examined by responsible Public Works Officers whether the present foundation of Mahavallipuram beam-

"The weight of the
Upharan" & the
proposed work of
the "Upharan" is in
every substantial C.—
I can give no opinion
regarding these technical
works. —
The Municipality has
estimated Rs. 646 for
"Madagascar"
705 for the "Upharan".
With best regards
